INSTRUCTIONS TO NEW MAIL BIDDERS

Bidding by mail permits you to participate in an auction as though you were attending it in person. The procedure is really quite simple. You tell us what you want, and the maximum amount you are willing to pay. We then, as your personal agent, try to buy the items listed for you at the lowest possible price.

LOT	BID
7	250
30	400
186	150
211	900
235	200

The enclosed mail bid form has two sides for you to fill in. The front side provides all the information we will need to register you as a bidder, execute your bids for you and deliver your lots to you if you are a successful bidder. Please answer all the questions that may apply to you. DON'T FORGET TO SIGN YOUR BID SHEET.

On the back side are pairs of columns where you may list your bids. After carefully reading the lot description, write down the lot number and the maximum amount you are willing to pay for that lot. Don't forget that a 10% buyer's fee will be added to your actual purchase price if you are the lucky bidder. Continue to list lot numbers and bids for each of the lots you are interested in buying.

When we receive your bid sheet, we will record your bids at the amount you have authorized us to bid for you, and we will, in addition, note any lots where an increase is authorized if absolutely needed to win the lot. For example, if the sample bid sheet shown at the right were yours, we would enter your bid on lot #7 as $250. If yours was the highest bid received, you would be the purchaser at $250. (plus 10%) or perhaps even less. If the second highest bid received on the lot was substantially less, your bid would be reduced to a "normal" increment above that second-highest bid, just as it would be if you were present at the sale yourself to execute your own bids. If you have authorized a percentage increase on the front side of your bid sheet and the bidding by others has exceeded your basic bid, we will then, as your personal agent, increase your bid to the minimum amount necessary to obtain the lot for you. The authorized increase will never be used except when your basic bid is exceeded.

Before you mail your bid sheet, do be sure to check it over to make certain you have bid on the correct lot(s) and that your bids are the ones you are both willing and able to pay for. Enjoy the catalogue, place bids on everything you would like to buy. If time is running out and you feel your bid sheet may arrive too late to be included, you may call our office between the hours of 8:30 a.m. and 5:00 p.m. Monday through Friday, giving us the lot numbers and amount you will pay for each lot, over the telephone. Please make sure you immediately send in your bid sheet for confirmation. Also, you may FAX your bid sheet to us. As your personal agents we wish you every success.

VIEWING OF LOTS

Lots will be available for viewing by prospective bidders at our office each day, Monday through Friday, by APPOINTMENT ONLY, between the hours of 9:00 a.m. and 5:00 p.m. October 14 through November 12, 1996 only. Additionally, all ancient coins will be available for viewing at the NYINC San Francisco Show (November 7-9, 1996).

COMMENTS & THOUGHTS ABOUT ALEXANDER III TETRADRACHMS

A silver tetradrachm of Alexander III of Macedon is among the most common basic tetradrachm type of ancient Greek coinage. For those not familiar with this coin of Alexander "the Great", the obverse shows the head of young Herakles facing right and wearing a lion's scalp; the reverse has Zeus enthroned left, either holding an eagle or with an eagle standing on his outstretched right hand and holding a long sceptre in his left. No legend appears on the obverse, and the most frequently encountered type has "ΑΛΕΞΑΝΔΡΟΥ" written down the right side of the reverse design. Various letters, monograms, symbols or names/titles appear on the reverse (a) at the right, (b) at the left, (c) beneath the throne, (d) in the exergue, or (e) any/all of the above, denoting the mint, moneyer and/or the date of issue.

The design elements of these coins are not solely artistic but indicated religious or political themes. With Alexander tetradrachms, the lion scalp-clad Herakles is found on coins issued by people to indicate a claim of descent from Herakles. The enthroned Zeus on the reverse may be viewed as a statement (or hope) of the protection being afforded the coin or its' issuer by the primary diety of Olympus. Tetradrachms of this type were struck bearing the name of Alexander from very early in his reign (336 BC) until his death in 323 BC and posthumously until the mid First Century BC. The same obverse and reverse designs were also used by Philip III of Macedon and various Seleukid rulers for at least 150 years after the death of Alexander.

The major current reference on the coinages of Alexander III is "The Coinage in the Name of Alexander the Great and Philip Arrhidaeus, A British Museum Catalogue" by Martin J. Price, published in 1991. This opus covers thousands of coin varieties of Alexander III and Philip III, identified by mints and dates when possible and clustering the "uncertain" pieces by geographic areas which seem most logical. As with many items of antiquity, there are always questions concerning the place or time of manufacture of materials, due in large part to the lack of written records; without this sort of reference material, the researcher must rely on hoards, representation of particular gods or symbols, literary records, archaeological remains, etc., to assist in assigning particular coins to a certain mint.

Let's look at some of the interesting exceptions to the basic Alexander tetradrachm type. One series of coins assigned to the mint of "Pella", Macedonia, has the head of Herakles facing to the left (Pr-204, 213, 213A & 215); these are much scarcer than the "usual" type. The obverses have no lettering except in several instances: single letters appear in the fields on 3 different tetradrachms of Arados (Pr-3304, 05 & 08); "ΝΙΚΟΚΛΕΟΥΣ" appears in tiny letters in the hair by the front of the lion's scalp on 7 different dies from Paphos, indicating issuance during the reign of King Nikokles (Pr-3118-23); "ANT" appears on the lion's jaw on 2 different pieces from Mesembria (Pr-1095 & 98) and Arados has one instance of "MY" appearing on the scalp (Pr-3403). Unfortunately, we do not have any of these interesting pieces to offer you in this sale.

There are some interesting varieties in the reverse designs. There are many differences in the design of the throne's legs, some thrones, of silver, gold or plain wood, have backs while others are backless, and some thrones have Nikes or eagles as decorations at the top of the back. Other minor variations exist with Zeus himself with his lower legs being parallel, slightly crossed, or with one foot noticeably further forward than the other. As mentioned earlier, "ΑΛΕΞΑΝΔΡΟΥ" normally is written down the right side of the reverse, with the title "ΒΑΣΙΛΕΩΣ" appearing at the upper left, in the exergue, and in rare instances, between the throne and the long sceptre. Another interesting coin from Antigoneia (?) Syria, has Zeus holding a small Nike instead of the eagle (Pr-3191).

During the early part of the 2nd. century BC Rhodos issued a series of Alexander type tetradrachms bearing roses and names or monograms at the left and/or in the exergue, and "P-O" beneath the throne, and Pr-2516 & 16A bear the name of the magistrate (moneyer?) "ΑΡΙΣΤΟΒΟΥΛΟΣ", although one does not have the "P-O" beneath the throne. Many names of magistrates/moneyers are known for the Alexander coin types as well as Rhodian contemporary "autonomous" issues with the facing Helios obverse and large rose reverse with and without the "P-O". Various scholars have determined that the "Helios/Rose" types without the "P-O" are not issues of Rhodes proper and are referred to as "pseudo-Rhodian" and were probably minted in Crete. During the time period in question various Greek kingdoms were recruiting mercenary forces to oppose an expected invasion of Greece by Rome. Many of the mercenaries being sought were from Crete and other parts of Western Asia and they were not happy about receiving Macedonian or other Greek silver coin as payment, preferring something "homelike", namely the Rhodian "roses". It is reasonable to assume that the Alexander-type tetradrachm from Rhodos, Pr-2516A may be a similar "pseudo-Rhodian".

Another area of interest is that of dated Alexander tetradrachms. The earliest dated pieces are from Ake, Phoenicia, bearing Phoenician numerals for the years 20 to 41 of an era which began in 346/5 BC (326/5-305/4 BC). Similarly, Sidon has coins dated under an era starting in 333/2 BC with Phoenician numerals for years 1-2 & 7-10, then with Greek numerals for years 10, 12-24 and repeating with years 1-4 in Greek numerals. The Syrian cities of Carne, Gabala, Marathus and Simyra issued coins dated by eras beginning in 360/59 BC, all using Phoenician numerals. In Lydia and Pamphylia various cities issued dated coins commencing with the defeat and withdrawal of Ptolemaic forces from the region between about 222 and 217 BC. These cities and their era commencement years are Termessos (ca. 222), Perga and Sillyum (ca. 221), Phaselis (ca, 218/7 BC), and Aspendos and Magydos (ca. 212 BC). The dates on coins from these cities run from year 1 through 31 (Aspendos & Termessos) or 33 (Perga, & Phaselis), with Sillyum represented only with years 3-6 & 11 and Magydos with year 14. These autonomous dated issues ceased in about 186 BC when Rhodes seized control over the area of Lycia. It is something to consider that the successful expansion of Rhodes into Lycia was obviously of major importance to those directly involved, but that this event was to be shortly overshadowed by the Roman seizure of all Greece.
